February, 2011

To the Gardeners on My List:

With the new spring fast approaching, we are offering you an order form listing our favorite vegetable, herb and flower plants that we sell. These are varieties we grow for our farm. We think they are the best choices and we know they grow well in the New England area.

Our prices are competitive with other organically raised plants. And you will note that our plants are grown in larger plug containers using organic soil mix, which makes for larger root systems and bigger, healthier and stronger plants – all the better for a healthy start in your garden.

Place your order by April 1 and you will be assured of getting the plants you want. This also helps us to know how much to plant.

To order, read the list, choose what you want, enter the quantity and multiply the quantity by the price to get the total for each item. (*Example: our Broccoli is sold in 6-packs. If you want 12 plants, enter "2" in the quantity column and multiply by \$3.50 to get \$7.00.*) Add up the order and send 50% to reserve the items you want.

The seed companies from which we purchase our seeds are noted by initials after each item so you can check their catalogs or web sites for detailed descriptions.

B = Burpee

FS = Fedco Seeds

HMS = High Mowing Seeds

HS = Harris Seeds

JSS = Johnny's Selected Seeds

NE = New England Seed Co.

PS = Park Seeds

S of C = Seeds of Change

S = Stokes

We will open for the season on Friday, May 20. You can pick up your plants from then through June 1.

Happy gardening!

Rosaly Bass

P.S. We also have two exciting items to offer you that no gardener should be without!
See the other side of this letter...

Rosalyn's "How To Grow An Organic Home Garden" Video & DVD

For years I dreamed about making a video on how to grow a home garden using all the techniques and secrets I have learned over 30 years of gardening organically. Several years ago, I set aside a small plot of land, found an experienced and talented video maker and videotaped throughout the season. Last year we decided to have the video made into a DVD for those of us who have more up to date equipment.

This beautifully filmed, three-volume video set and two-volume DVD set is a treasure trove of secrets for all gardeners. It lays out in a home garden or on a farm, how to grow vegetables, flowers and herbs, covering such topics as choosing a location, testing and preparing your soil, planning and planting your plants, harvesting and putting your garden to bed in the fall. All aspects of an entire gardening season are spread before you in a flowing, easy to understand, pleasing to look at manner.

Rosalyn's "Organic Gardening" Book

My book, "A Treasure Chest Of Organic Gardening Ideas", is packed with information on how to grow an organic garden and enjoy the bounty you produce. It covers a wide range of topics you won't find elsewhere:

- * How to get the earliest possible start
- * Tips for buying the best plants for your climate
- * Making the best use of your gardening space
- * Preventing insect and animal damage to your crops
- * The best ways to prevent weeds
- * The most efficient ways to water
- * Ideas for preserving and storing produce
- * Lots of recipes and cooking hints

Your Satisfaction Is Guaranteed!

The three-volume video and two-volume DVD are \$30 each, and the book sells for \$25. Order your copies on the back of the plant order form. If you want to receive the book, video or DVD before you pick up your plants, please add \$5 for shipping & handling per item.

The video, DVD and book are unconditionally guaranteed for your satisfaction. If you are not fully satisfied, your money will be refunded (minus shipping & handling).
